# Jacob Paul Kiesel

## PROFILE

I'm Jacob Kiesel, a front end developer based in Austin, TX. I got my start with HTML and CSS trying to make my myspace page look cool. Fast-forward a while and that hobby has developed into a passion. I've had the pleasure to work on a few projects for local bands and build projects for my own personal use.

## EXPERIENCE

### ASSISTANT GENERAL MANAGER, TACODELI, AUSTIN, TEXAS — 2012-PRESENT

I was responsible for the leadership and the operations of a restaurant serving over three thousand guests a week. I've taken away excellent people skills, good organizational skills and a higher standard for the work I preform and oversee.

## EDUCATION

### AUSTIN COMMUNITY COLLEGE, 2012-2014.

I spent a few years attending here studying computer science. Didn't complete a degree but took away many thing from my there.

### CEDAR PARK HIGH SCHOOL, 2006-2010. GRADUATED WITH 3.4 GPA

I mainly focused on art in high school, going to star levels with pieces, and participating in after school art clubs.

## TOOLS

- HTML5
- CSS
- Javascript ES6+
- React
- NPM
- Git / Github

## PROJECTS

### RUN TRACKER AND LOG | VISIT SITE

**Description**: An app designed and developed to help track running progress.

- Utilizes the openWeatherMap API and the LeafletJS API
- Developed with CRUD functionality
- Utilized and optimized third party LeafletJs plugins through research of their documentation.

### BUG TRACKER | VISIT SITE

**Description**: A bug tracker utilizing localStorage to create, read, update and delete logs of bugs within projects I'm working on.

- Utilities localStrorage to store logs and JSON parsing to receive and persist them.
- Also developed with CRUD functionality
- Built with components like modals and forms
